## Summary

Full stack web developer with a background in cosmetology eager to use my expertise of color theory, design, and passion for creating elevated user experiences and technology centered websites and applications. Driven by challenging goals and creative problem solving. Recently earned a certificate in full stack web development from the University of Washington having honed skills in JavaScript, NodeJS, React, and MySQL and MongoDB databases. Ambitious about continuing to evolve my craft of coding.

## Technical Skills

Node.js, Express, JavaScript, JQuery, React.js, React Native, Git, GitHub, MongoDB, MySQL, HTML, CSS, Bootstrap, Media Queries, APIs, JSON, REST, AJAX, Git Bash

## Projects

### Rambler - [GitHub](#) [Heroku](#)

A hiking resource. Users can search for hikes, save them to a bucket list to reference later, and save them to a hike log to see past hikes with data visualization to see where they've gone.

*Technologies Used: MongoDB, Express, React, NodeJS, JavaScript, Google OAuth, Passport, Axios, Cheerio, Bulma CSS, REI Hiking Project API, LocationIQ API, OpenWeather API*

### Paranormal Activity Reporter - [GitHub](#) [Heroku](#)

A message board application for users to view and post conspiracy-fueled content in 8 different categories.

*Technologies Used: HTML/CSS, Bulma CSS Framework, JavaScript, JQuery, NodeJS, Express, Express-handlebars, MySql, Passport, Sequelize, bcrypt, dotenv.*

### Eats & Events - [GitHub](#)

A web application that allows a user to find restaurants and events by search criteria or nearby with links to reserve tickets with ticketmaster.

*Technologies Used: HTML/CSS, Foundation CSS Library, JavaScript, JQuery, Zomato API, Discovery API, Ticketmaster API.*

## Experience
